

Litho w/Wyckoff Patent

Lithograph – paper type varieties

79-E25a-r – Lithographic Printing Experiments.

The desire was to lower the overall cost of printing stamps using lithography as opposed to engraved steel plates. These experiments were conducted using standalone lithographic printing as well as incorporating the various patents of Loewenburg, Wyckoff, and MacDonough. Further experiments were conducted using the "C" grill roller to grill points up and down examples

Litho w/Loewenburg Patent

Lithograph

Lithograph
